Summary

Software Engineer with 4+ years of professional experience building backend services, RESTful APIs, data pipelines and web applications with Python (FastAPI, Django, Flask), Go and TypeScript. Experienced in deploying and running workloads on AWS and GCP with Docker, Kubernetes, Terraform and CI/CD, and using AI assistants such as Claude Code, ChatGPT and Cursor since 2025.

Work Experience

Sandbox Group — London, England, United Kingdom
Software Engineer | Full-time · Remote — September 2025 – Present

- Developing Python (FastAPI, Flask) and Go backend services and RESTful APIs for the PlayKids app and SVOD partner integrations in the Kids & Family vertical.
- Deploying services to AWS and GCP with Docker, Kubernetes and Terraform through CI/CD pipelines.
- Building frontend features with Next.js, React and TypeScript.
- Using Claude Code and Cursor for AI-assisted development, code review and refactoring.

Thoughtful AI — Austin, Texas, United States
Forward Deployed Engineer | Contract · Remote — August 2025 – April 2026

- Built Python RPA bots to automate Revenue Cycle Management (RCM) workflows for US healthcare providers, replacing repetitive manual tasks.
- Built internal Python libraries, FastAPI RESTful APIs and tools that other engineers reused to develop and deploy bots faster.
- Used ChatGPT and Cursor for AI-assisted development across bots and internal tooling.

B3 — Recife, Pernambuco, Brazil
Software Engineer | Full-time · Hybrid — April 2024 – August 2025

- Worked at Neurotech (Trillia), a B3 company, on data engineering and backend development.
- Built backend services and RESTful APIs with Python, FastAPI and Go, and extracted data from web sources and AWS S3 into a data lake.
- Automated ETL pipelines with Apache Airflow and monitored them with Grafana dashboards.
- Provisioned and ran workloads on AWS (Lambda, Step Functions, DynamoDB, Athena, S3, EC2) and GCP with Terraform, Docker and CI/CD.

GPC Gestão — Recife, Pernambuco, Brazil
Full Stack Developer | Freelance · Remote — September 2024 – October 2024

- Built an admin web app with React, TypeScript and Tailwind CSS to view, manage and download water consumption documents across multiple properties.

Jalan — São Paulo, São Paulo, Brazil
Full Stack Developer | Full-time · Remote — April 2024 – May 2024

- Built web application features with Vue.js and Quasar, backed by Python RESTful APIs on AWS Lambda.

aca.so — Recife, Pernambuco, Brazil
Mobile Engineer | Freelance · Remote — March 2024 – March 2024

- Developed features for the aca.so mobile app with React Native, React Redux and TypeScript.

Oncase — Recife, Pernambuco, Brazil
Software Engineer | Full-time · Remote — August 2022 – December 2023
Full Stack Developer | Internship · Remote — February 2022 – August 2022

- Developed Big Data applications on GCP and AWS, designed for scalability and low running costs.
- Built RESTful backends with Python (Flask, Django) and frontends with React, React Redux and TypeScript.
- Automated ETL pipelines with Apache Airflow and CI/CD pipelines with Docker and GitHub Actions.
- Deployed applications to GCP (Cloud Run, Artifact Registry) and AWS (Amplify, Route 53, Lambda).

InSpace — Recife, Pernambuco, Brazil
Mobile Engineer | Freelance · Remote — August 2022 – October 2022

- Built a React Native feature that identifies objects such as vehicle licence plates through the phone camera, for legal use cases.

Educandus — Recife, Pernambuco, Brazil
June 2021 – October 2021
Game Developer | Internship · Remote — May 2020 – December 2020

- Built educational games for preschool to secondary school students with Construct 3 and JavaScript.

Education

Federal University of Pernambuco (UFPE) — Bachelor • Final grade (GPA): 9.02/10.0
Computer Engineering — Recife, Pernambuco, Brazil • February 2019 – August 2024
MQF Level 6 (Reference Number: MQRIC 2025/28761).
Undergraduate Thesis (PT-BR)

Federal University of Pernambuco (UFPE) — Student Teaching Assistant
Software and Systems Engineering — Recife, Pernambuco, Brazil • June 2022 – March 2024
Supported students in software development and requirements engineering, helping them build well-engineered applications.
